see p56 for details

## T&M Breeding Programme

Over the years Thompson & Morgan have introduced some ground-breaking new plant varieties to the world, from both seed and vegetative propagation. Some of the most memorable varieties are:

- **The world's first red Rudbeckia, Cherry Brandy.**
- **SunBelievable™ 'Brown Eyed Girl', the sunflower that produces over 1,000 flowers per season.**
- **The Cosmos 'Cupcakes' series, famous for its unique cup-shaped fused petals.**
- **The hybrid perennial Foxglove, Digitalis Illumination.**

Thompson & Morgan's own bred lines remain ever popular, with consistent demand from all around the world. Having been carefully bred and extensively trialed, you can be sure of the quality of varieties that have come out of Thompson & Morgan's breeding programme.

## What we offer

### Promotional Seeds

In addition to our bulk seed sales, we are also able to offer bespoke promotional seed packets which are perfect for a huge range of uses, from magazine cover mounts to business cards containing your favourite seeds.

To find out more, turn to page 62 or email [info@promoflowers.com](mailto:info@promoflowers.com).

### Broker Services

Here at Thompson & Morgan Wholesale, as well as supplying top quality, unique varieties from our own breeding, we also have a reputation for being able to source almost any seed variety imaginable. Let us do the hard work and receive one parcel containing all of your favourite varieties, instead of spending time sourcing from many different suppliers and paying a fortune in fees for freight and export documents.

Contact [wholesale@thompson-morgan.com](mailto:wholesale@thompson-morgan.com) to see how we can help you.

### Retail Stands

If you would like to stock any of the varieties featured in this catalogue (and many more!) on a retail stand in your garden centre or shop, please get in touch with our friendly sales team at [retail@thompson-morgan.com](mailto:retail@thompson-morgan.com). They will be happy to help with any questions you may have.

## T&M Wholesale 2020

Our brand new 2020 catalogue builds on our successes of 2019 and includes a selection of new varieties from Thompson & Morgan's own breeding as well as other special selections. You can find these brand new additions on pages 4-9. Highlights include Tagetes 'Daisy Wheel Lemon' and Antirrhinum 'Mini Cherry Cola' from Thompson and Morgan's own breeding programme. We have also decided to add some unique varieties from our mail order range to our wholesale offering; exciting examples include Papaver 'Amazing Grey' and Squash 'Baked Potato' and 'Mashed Potato'.

For 2020, we will be focusing on delivering the highest levels of customer service alongside our wide range of innovative and unique products. Whether you are a packet seed company, grower or broker, we believe there is something for you in our range. We always try to accommodate special requests, so if you need seed packed in custom pack sizes or there's a variety that you just can't find, let us know and we will do our best to help.

**Full Shade** Less than 2 hours of direct sun

# NEW

- FOR 2020 -

Choose from our latest additions to our range

1

## 1. Papaver 'Amazing Grey' 34813 (rhoeas)

- A stunning new version of the traditional poppy
- Boasts unique, ruffled, semi-double blooms in sensational shades of grey
- Winner of a Fleuroselect Novelty Award

HP: H. 80cm (32in). Flowers: May-Jul. Sun. Borders.

## 2. Pumpkin 'Wee Bee Little' 34901

- All America Selections winner
- A true miniature pumpkin
- Ideal for cooking, carving and painting

H: 45cm (18in). Harvest: Sept-Oct. Sun. Veg patch, borders.

## 3. Cosmos 'Xsenia' 18190 (bipinnatus)

- Unique terracotta orange petals edged in rose pink
- Colour tones change depending on the sunlight
- Makes an excellent cut flower

HH: H. 50-60cm (20-24in). Harvest: Jul-Oct. Sun. Borders, containers.

## 4. Sweet Pea 'Top to Bottom' 34906

- A highly floriferous variety
- Blooms from the top of the plant to the base
- A cheerful mix of colours with a scent to match

HA: H. 1.8m (6ft). Flowers: Jul-Aug. Sun. Borders, container.

## 5. Tomato 'Sungold' 840

- An outstanding cordon cherry tomato
- Ideal for both glasshouse and outdoor cultivation
- Produces golden orange fruits that are irresistibly sweet and juicy
- A hardy nature with good disease resistance

H: 2m (79in). Harvest: Jul-Oct. Sun. Veg patch, glasshouse, border, container.

2

3

4

5

- A brand new variety from Thompson and Morgan's own breeding
- A great variety for beds

6

## 6. Marigold 'Daisy Wheel Lemon' 34886

- Large, showy single lemon yellow blooms are produced from June to September
- It is an effective deterrent against greenfly and whitefly when planted in the greenhouse or outdoor borders

HH: H. 15-25cm (6-10in). Flowers: Jun-Sept. Sun. Borders, containers.

1

2

**1. Zinnia 'Zahara Double Berries Mix'**  
**34905** (marylandica)

- Stunning double flowers in a spectacular mix of three different colours
- Outstanding garden performance when planted en-masse in a sunny border

*HA, H. 45cm (18in). Flowers: Jul-Oct. Sun. Borders, containers.*

**2. Antirrhinum 'Mini Cherry Cola'**  
**34884**

- Some of the darkest foliage seen in Antirrhinums
- Blooms boast striking puffed petals and will be produced for months
- Outstanding garden performance

*HH-A, H. 60cm (24in). Flowers: Jul-Sept. Sun. Borders, containers, bedding.*

3

**3. Broad Bean 'Luz de Otono'**  
**48636**

- 25cm long pods each containing between five and seven beans
- A great choice for over wintering as it has good cold resistance

*H. 1m (39in). Harvest: Sept-Oct. Sun. Veg patch, borders, containers.*

**4. Kale Babyleaf Mix**  
**34891**

- Perfect for salad, or can be enjoyed lightly steamed with a variety of dishes
- Rich in vitamins, minerals, antioxidants and phytochemicals
- Six times more calcium than broccoli

4

5

**Laurentia Star series**  
(axillaris)

**5. 'Blue Stars'**  
**7409 - Raw Seed**  
**4379A - Pellets**

**6. 'Pink Stars'**  
**7400 - Raw Seed**  
**4380 - Pellets**

- Two outstanding colours of 'Blue Stars' (top) and 'Pink Stars' (bottom)
- An ideal choice for large containers and hanging baskets
- A profusion of colour

*HH-A, H. 20cm (8in). Flowers: Jul-Oct. Sun. Borders, containers, bedding.*

6

- A delicious alternative to mashed potato
- Keeps its colour well into autumn

**7. Squash 'Mashed Potato'**  
**34758**

- A white-skinned acorn type squash with tasty white inner flesh
- Can be baked, fluffed and seasoned as a low carbohydrate, high fibre alternative to mashed potato
- An ideal choice for the veg patch or kitchen garden

*H. 70cm (28in). Harvest: Sept-Oct. Sun. Veg patch, borders, containers.*

**8. Squash 'Baked Potato'**  
**34757**

- A typical pale tan skin
- Flesh that looks and tastes like baked potato when roasted
- A healthy alternative to potatoes
- A great addition to the veg patch

*H. 70cm (28in). Harvest: Sept-Oct. Sun. Veg patch, borders, containers.*

- Brings a whole new look to the acorn squash market
- More fibre and less carbohydrates than potatoes

7

8

- Nectar rich blooms are loved by pollinating insects

*HH-P. H. 60cm (24in).*

**10. 'Blue Beau'™**  
**9391** (atropurpurea)

- Masses of bright blue flowers produced all summer
- Compact and long flowering

*HA. H. 45cm (18in).*

**11. 'Burgundy Beau'™**  
**9392** (atropurpurea)

- Neat compact plants with rich burgundy blooms
- Flowers held on wiry stems

*HA. H. 90cm (36in).*

**12. 'Night & Day'™**  
**6681** (atropurpurea)

- Highly contrasting mix of black and white flowers with a delicate fragrance

*HA. H. 90cm (36in).*

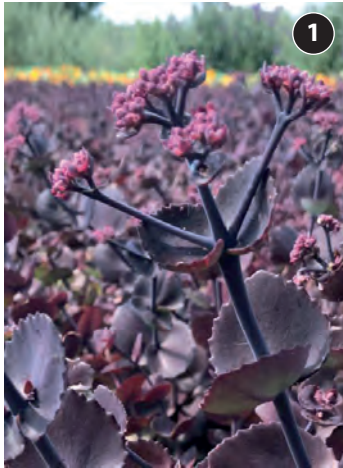

**13. 'Pixie Yellow'™**  
**9393** (ochroleuca)

- An outstanding compact variety
- Produces pale yellow pincushion-like flowers all summer long
- Blooms atop short, wiry stems

*HH-P. H. 30cm (12in).*

**Sedum**  
*HP. Flowers: Aug-Sept. Sun. Borders, bedding, containers, rockeries.*

**1. 'Turkish Delight'**  
**4539** (ussuriense)

- T&M's own attractive dwarf selection
- Stunning in containers, borders or rockeries
- Deepest burgundy, almost black foliage and carmine-red flower umbels

**Silene**  
*HP. Flowers: Aug-Sept. Sun. Borders, bedding.*

**2. 'Starburst'**  
**3283** (lacinata)

- Unusual bright red serrated flowers
- Long flowering period

*H. 60cm (24in).*

**3. 'Peach Blossom'**  
**7512** (pendula)

- Double peach-blossom blooms with masses of double flowers
- Blooms up to 2cm across
- Ideal for containers and baskets

*H. 15cm (6in). Baskets.*

**Tagetes**

- Marigolds will add colour to summer garden displays
- Tall varieties will add height and interest to bedding
- Dwarf varieties create an excellent edging plant

*HH. Flowers: Jun-Frost. Sun. Borders, bedding.*

**4. 'Simba Yellow'**  
**61143** (erecta)

- Attractive chrysanthemum type flowers
- Adds colour throughout summer

*H. 50cm (20in).*

**5. 'Yummy Mummy'**  
**5977** (erecta)

- A bright mix of yellow, orange and gold chrysanthemum type flowers

*H. 30cm (12in).*

**'Savannah' series**  
(erecta)  
*H. 90cm (36in).*

**6. 'Savannah Gold'**  
**60599**

- Rich golden flowers create a stunning display throughout the summer

**7. 'Savannah Ivory'**  
**5476**

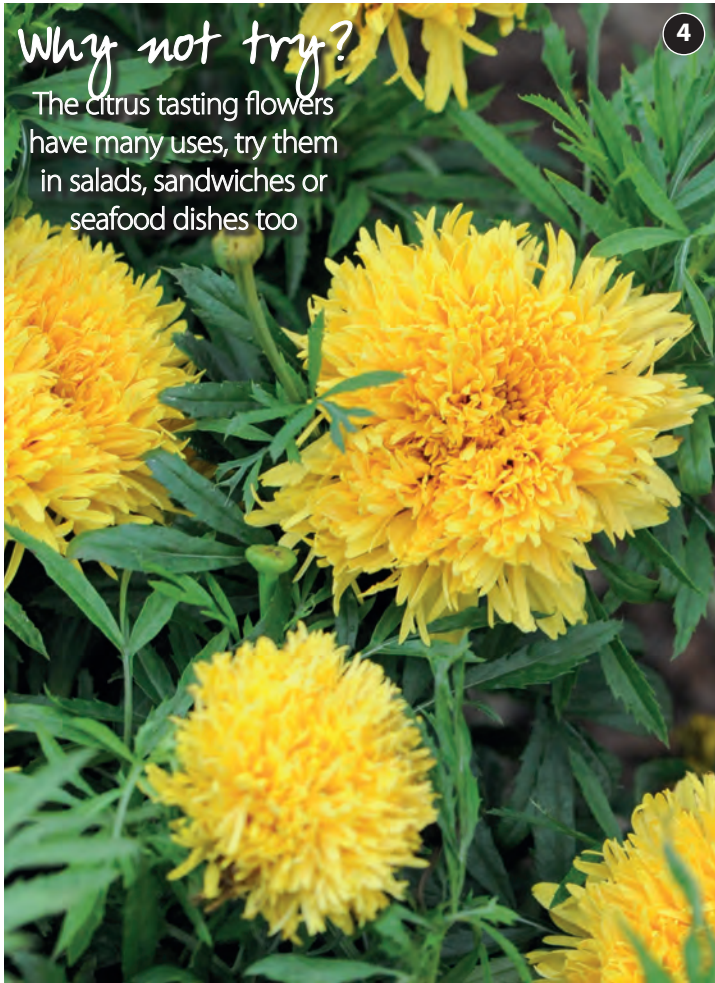

- Pure creamy white flowers create a cool display

**8. 'Savannah Moon'**  
**54509**

- Rich yellow flowers

**9. 'Savannah Sun'**  
**60599**

- Orange blooms create a stunning display

*Why not try?*  
The citrus tasting flowers have many uses, try them in salads, sandwiches or seafood dishes too

TAGETES

- Flowers the size of golf balls
- Bicoloured fully double blooms
- Neat compact plants

1

Tagetes - continued

HH-A. Flowers: Jun-Oct. Sun/part shade. Borders, bedding, containers.

1. 'Colossus' 7666 (patula)

- Small compact plants produce huge orange-red bicoloured flowers on small compact plants
- Flower heads are larger than a golf ball
- Ideal for the front of a border or in containers as well

H. 20cm (8in).

2. 'Amber Glow' 50576 (patula)

- Compact floriferous plant
- Bright amber flowers each with a yellow border
- Good performance all summer, effective bedding plant

H. 25cm (10in).

3. 'Bambino' 3941 (patula)

- Bright orange and yellow bicoloured flowers
- Blooms are produced on a compact plant
- Ideal for the front of a border or in a container

H. 45cm (18in).

4. 'La Bamba' 6954 (patula)

- Unusual striped orange flowers

H. 20cm (8in).

5. 'Mr Majestic' 1552 (patula)

- Highly contrasting striped flowers
- Fleuroselect Novelty Award

H. 25cm (10in).

6. 'Mr Majestic Double' 5317 (patula)

- The old favourite Mr Majestic but now in double form
- Highly contrasting double blooms with bright yellow and mahogany flowers

H. 40cm (16in).

7. 'Pots of Gold' 38769 (patula)

- An exclusive blend of French Marigolds
- Includes three fiery colours: golden, striped and a vibrant red
- Attractive to bees and butterflies

H. 60cm (24in).

8. 'Solan' 3451 (patula)

- Wonderfully contrasting rich orange and dark red flowers produced on compact plants
- Flowers are produced throughout the summer

H. 20cm (8in).

9. 'Sunglow' 50590 (patula)

- A bright and cheerful combination of amber and yellow blooms
- Good performance all summer

H. 25cm (10in).

10. 'Sunshine' 50570 (patula)

- Bright yellow flowers
- Good effective bedding plant with good performance all summer
- Ideal for pots, containers and borders

H. 25cm (10in).

**Thunbergia**

- Vigorous climbers, ideal for trellises
  - Easy growing and heat tolerant
- HH4A. H. 1.5m (5ft). Flowers: Jul-Oct. Sun. Borders, containers, trellis.*

**1. 'Amber Eyes'**  
**9423** (alata)

- The plants are covered in a mass of creamy yellow flowers with a dark eye
- Ideal for creating a stunning focal point in garden displays

**2. 'Blushing Susie'**  
**7359** (alata)

- Unique predominately red-shaded flowers with contrasting black eyes
- A vigorous climber
- Ideal for containers

**3. 'Golden Eyes'**  
**3423** (alata)

- The plants are covered in a mass of rich orange flowers with a dark eye
- Easy growing and heat tolerant

**4. 'Spanish Eyes'**  
**7740** (alata)

- An unusual warm colour mixture with contrasting black eyes

**Tropaeolum**

- Nasturtiums are free flowering and easy to grow in borders, baskets and containers
  - The large seeds are easy to direct sow
  - Produces large drifts of colour
  - Flowers are held above the foliage and can be picked as an edible decoration
- HH4A. H. 30cm (12in). Flowers: Jun-Sept. Sun. Borders, containers.*

**5. 'Hawaiian Mix'**  
**5439** (majus)

- Delicious mix of cherry, cream and apricot shades
- Ideal for containers and bedding

**6. 'Jewel of Africa'**  
**1794** (majus)

- Unique, attractive foliage for a climbing type
- Good as ground cover and full of colour

**7. 'Night & Day'**  
**5298** (majus)

- Attractive mix of contrasting cream and mahogany flowers
- Ideal in containers or garden borders

**8. 'Strawberry Cream'**  
**5299** (majus)

- An attractive mixture of primrose spotted and red flowers
- Attracts many beneficial insects to the garden

**9. 'Zanzibar'**  
**5995** (majus)

- A vibrant mix of bright red, yellow and orange
- Contrasting dark foliage

**Tropaeolum - continued**  
*HH-A, H. 30cm (12in). Flowers: Jun-Frost, Sun. Borders, containers.*

- 1. 'Alaska Apricot'**  
**9892** (majus)
- Bright apricot flowers held well above the variegated foliage
  - Creates excellent bushy groundcover
  - Very easy to grow and relatively pest and disease free

- 2. 'Alaska Raspberry'**  
**9893** (majus)
- Raspberry red flowers
  - Blooms are easy to view above the attractive variegated foliage
  - Compact and tidy plants form 12in mounds
  - An easy to sow annual

- 3. 'Alaska Scarlet'**  
**1809** (majus)
- Beautiful bright cherry red flowers
  - Attractive variegated foliage
  - Grow alongside other single colour nasturtiums for stunning colour contrasts in the garden
  - Thrives in poor soils

- 4. 'Canary'**  
**4610** (majus)
- A compact, bushy, small-leaved nasturtium
  - Attractive markings on each petal
  - Produces blooms until the first frost
  - One of the longest flowering varieties

- 5. 'Double Delight Cream'**  
**21487** (majus)
- Semi-double to double creamy flowers
  - Good compact plants with a spreading habit
  - Easy to grow direct sow annual

- 6. 'Orchid Cream'**  
**50504** (majus)
- The summer flowers look just like exotic orchids
  - Each cream flower boasts a highly unusual contrasting red splash
  - Ideal for planting en-masse

- 7. 'Orchid Flame'**  
**50503** (majus)
- Blooms open rich burgundy-red colour and then fade to reveal a delightful yellow and red bicolor

- 8. 'Phoenix'**  
**48052** (minus)
- Curious split petals make flame-like flowers
  - Very eye catching
  - Produces blooms in abundance

- 9. 'Raspberry Fool'**  
**38771** (majus)
- A delightful blend of raspberry and pink flowers
  - Semi-double and single blooms are held above the foliage and are produced all summer long
  - The perfect addition to any border

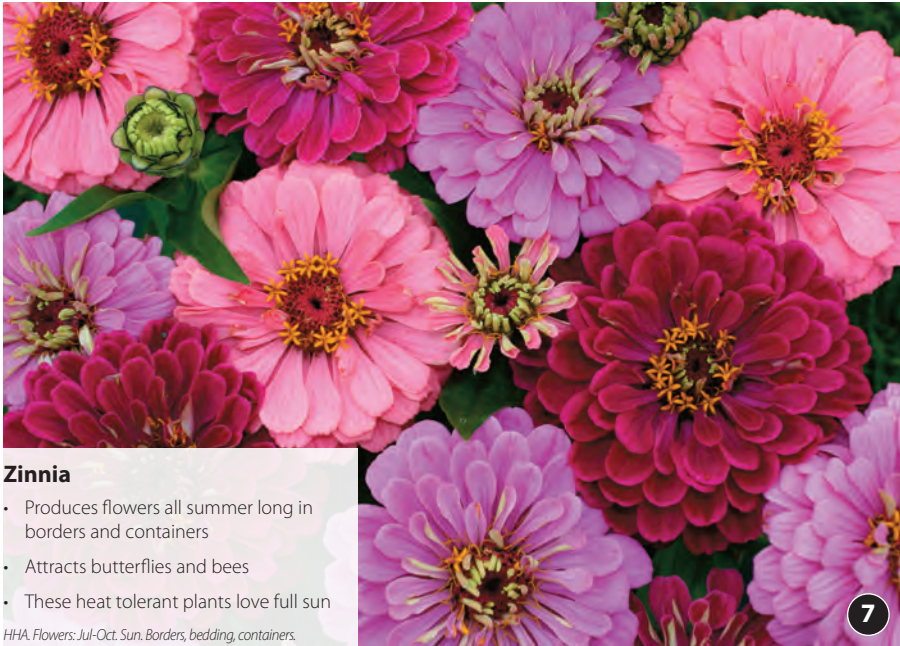

- 10. 'Salmon Mousse'**  
**1752** (majus)
- Unusual salmon coloured flowers contrast well against the dark green foliage
  - Neat, compact, free flowering plants ideal for beds, borders and containers

*Why not try?*  
The peppery flavour of the leaves and colourful flowers will enrich salads and the unripe seeds can be used like capers

**Viola**

- Use Viola and Pansies in borders, baskets and containers for spectacular displays
- Beautiful shades
- Adds interest to garden displays

*HA. Flowers: Feb-May. Sun/part shade. Borders, bedding, containers.*

**1. 'Bunny Ears' 54395** (hybrida)

- Cheeky little Violas that retain that classic pansy face beneath unusually long 'rabbit ear' top petals

*H. 20cm (8in).*

**2. 'All Spice Mix™' F1 9634** (hybrida)

- A spectacular trailing Viola with an exotic range of fragrances

*H. 30cm (12in).*

**3. 'Amber Jewel Mixed™' 4291** (hybrida)

- Unique mixture of amber, raspberry, copper and plum scented flowers

*H. 15cm (6in).*

**4. 'Brunig™' 3078** (x wittrockiana)

- Highly contrasting flower colour

*H. 15cm (6in).*

**5. 'Fire Shades™' 4464** (hybrida)

- A bright mix of cherry red, pink and yellow flowers

*H. 15cm (6in).*

**6. 'Rose Shades™' 7791** (hybrida)

- Highly scented, unique rose flower shades

*H. 15cm (6in).*

**Zinnia**

- Produces flowers all summer long in borders and containers
- Attracts butterflies and bees
- These heat tolerant plants love full sun

*HH-A. Flowers: Jul-Oct. Sun. Borders, bedding, containers.*

**All mixtures are available as separate colours** (except 'Candy Mix™')

**7. 'Art Deco™' 5994** (elegans)

- Contrasting mix of royal purple, light pink and lavender
- Great for cutting

*H. 90cm (36in).*

**8. 'Candy Mix™' 5992** (elegans)

- Scabious-flowered zinnia in a wide range of vivid colours
- Attracts beneficial insects to the garden

*H. 75cm (30in).*

**9. 'Citrus Cocktail™' 9903** (elegans)

- A bright zesty blend of white, yellow and orange fully double flowers

*H. 90cm (36in).*

**10. 'Edwardian™' 9907** (elegans)

- Highly floriferous with 5cm flowers

*H. 60cm (24in).*

**11. 'Queeny Lime Red' 84855** (elegans)

- Perfectly-formed blooms in a unique colour combination make a spectacular display
- Bushy and compact with formidable garden performance
- Loved by bees and butterflies

*H. 75cm (30in).*

**12. 'Tudor™' 5990** (elegans)

- These large 8cm (3in) bright purple double flowers are heat tolerant and great for cutting

*H. 90cm (36in).*

**Zinnia - continued**  
*HH-A, H. 90cm (36in). Flowers: Jul-Oct. Sun. Borders, bedding, containers.*

**1. 'Inca™'**  
**5991** (elegans)

- Large and fully-double bright orange cactus flowers
- Adds a fantastic shade to borders

---

**2. 'Pinca™'**  
**9717** (elegans)

- Large and fully double bright pink cactus flowers
- A real eye catcher
- Sure to stimulate conversation
- Free flowering and heat tolerant

---

**3. 'Senora™'**  
**9714** (elegans)

- Very large double salmon pink flowers
- An unusual colour for a Zinnia
- Great for cutting
- Free flowering

**'Aztec' series**  
(haageana)

**4. 'Aztec Burgundy Bicolour™'**  
**3634**

**5. 'Aztec Gold™'**  
**9396**

**6. 'Aztec Orange™'**  
**9397**

**7. 'Aztec Red Bicolour™'**  
**9399**

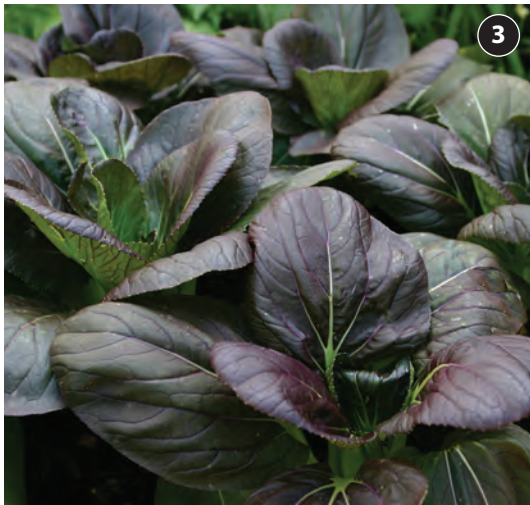

**8. 'Aztec Sunset Improved™'**  
**4294**

- Four striking separate colours available in straight colours and also contrasting bicolours
- Well branched habit, with fully double flowers and good resistance to mildew
- Fleuroselect Gold Medal

BEETROOT - RADISH

Beetroot

HA. H. 30cm (12in). Harvest: Jun-Oct. Sun.

- 1. ‘Rainbow Beet’ 38788** (Beta vulgaris)
- A visually stunning mixture of five beetroot varieties
  - Contrasting outer skins, flesh, stems and leaves
  - A deliciously sweet flavour

Cat Grass

HH/A. Flowers: Jul-Oct. Sun. Borders, bedding, containers.

- 2. ‘Tabby’ 9599** (Hordeum vulgare variegata)
- Provides vitamins and fibre for your cat’s diet
  - Edible for humans too

Pak Choi

H. 30cm (11in). Harvest: Jun-Oct. Sun.

- 3. ‘Purple’ 92** (Brassica rapa)
- Reddish-purple top leaf contrasts with the green undersides

Pepper

H. 30cm (11in). Harvest: Jun-Oct. Sun.

- 4. ‘Bhut Jolokia Red’ 9599** (Capsicum annuum)
- One of the world’s hottest chillies, over 1 million Scovilles
  - Best grown in warm conditions

Pumpkin

HA. H. 45cm (18in). Harvest: Sept-Oct. Sun.

- 5. ‘Zombie’ F1 Hybrid 34347** (Cucurbita pepo)
- The ugliest pumpkin imaginable
  - Produces fruits of 3-4kg

Radish

- Ideal for adding to salads
  - Stunning colours
- Sun/part shade.
- 6. ‘Bluemoon’ & ‘Redmoon’ F1 Mix 79397** (Raphanus sativus)
- Uniquely coloured skin and flesh
  - The conical roots are easy to grow and make an excellent crop for containers and window boxes
  - Crisp texture with mild flavour
- H. 15cm (6in). Harvest: May-Oct.

Also available as separate colours

- 7. ‘Rainbow Mix’ 18543** (Raphanus sativus)
- Vibrant roots of purple, red/white bicolour, white, red and gold
  - Quick growing crops can be harvested in as little as 28 days, and are perfect for successional crops
- H. 25cm (10in). Harvest: Apr-Oct.

Tomato

- A veg patch/greenhouse essential
  - Ideal for adding flavour to salads and equally tasty on their own
- Harvest: Jul-Oct. Sun.

- 8. ‘Ailsa Craig’ 283** (Solanum lycopersicum L.)
- Noted for its exceptional flavour
  - A gardener’s favourite, that’s ideal for indoors and outdoors
- H. 2m (7ft).

- 9. ‘Alicante’ 281** (Solanum lycopersicum L.)
- Indeterminate/Cordon type with 75g fruits
  - Produces consistently heavy, greenback free, sweet fruits
- H. 2m (7ft).

- ‘Balconi’ collection** (Solanum lycopersicum L.)
- 10. ‘Balconi Red™’ 399**
- 11. ‘Balconi Yellow™’ 390**
- A bush container type with clusters of delicious fruits
  - No side shooting is required as the plants are naturally bushy
- H. 30cm (12in).

- 12. ‘Black Russian’ 319** (Solanum lycopersicum L.)
- A cordon type heritage variety
  - Mahogany medium sized fruits
- H. 2m (7ft).

- 13. ‘Gardener’s Delight’ 277** (Solanum lycopersicum L.)
- Easy to grow tangy bite size fruits
  - Reliable and prolific
- H. 2m (7ft).

- 14. ‘Ildi™’ 404** (Solanum lycopersicum L.)
- Up to 80 fruits per truss
  - Perfect for containers
- H. 1.5m (5ft).

- 15. ‘Orange Ray’ 75101** (Solanum lycopersicum L.)
- Striped Roman tomato with ‘real tomato’ flavour, and few seeds
- H. 1.5m (5ft).

Watermelon

HH/A. H. 1.5m (5ft). Harvest: Aug-Oct. Sun.

- 16. ‘Mini Love’ F1 Hybrid 17293** (Citrullus lanatus)
- Produces up to five 3-5kg melons
  - Best grown up a wigwam structure to hold fruit off the soil
  - Vigorous habit if allowed to trail on ground

# PROMOTIONAL SEEDS

Thompson & Morgan produced over 11.3 million promotional packets in 2019 - nearly 4.2 million more than in 2018!

# PROMOTIONAL SEEDS

## What can we offer?

Thompson & Morgan can offer a wide variety of different promotional seed packets to suit almost any requirement. We have previously provided packets for magazine cover mounts, charities, museums, book inserts, veterinary surgeons and funeral homes. We have also provided business card seed packets which can really help you to stand out from the competition.

- 3 packet types – envelope, sachet (Paper/PE or foil lined) and plain foils.
- Matt or gloss finish.
- Range of different packet sizes – 60mm x 60mm, 80mm x 70mm, 90mm x 60mm, 90mm x 90mm, 95mm x 132mm and 150mm x 145mm.
- Minimum order 500 packets; there is no maximum order!
- 4 colour bespoke artwork to front and back – you can provide this or we can help you to design your artwork (charges apply).
- As one of the largest UK seed companies with a significant mail order, retail and wholesale presence, we have excellent buying power and can provide almost any variety of seed at very competitive prices.
- Thompson & Morgan has its own breeding programme, meaning we can offer new and exclusive seed varieties that are not available anywhere else.

If you would like to find out more or have any questions, please contact [info@promoflowers.com](mailto:info@promoflowers.com). Also, check out the case studies on this page and the next to see some of our previous work!

## Royal Botanic Gardens, Kew

As well as the licensed range of Kew seeds sold by Thompson & Morgan, we have also produced several bespoke seed packets for sale exclusively by Kew.

- Promotional seed packets are a great choice for one-off events, specific seed requirements (for example, bee friendly seeds) or where smaller packet quantities are needed.
- The minimum order is just 500 packets per variety and we can incorporate almost any seed variety and artwork style into the design.

Garden News and Garden Answers

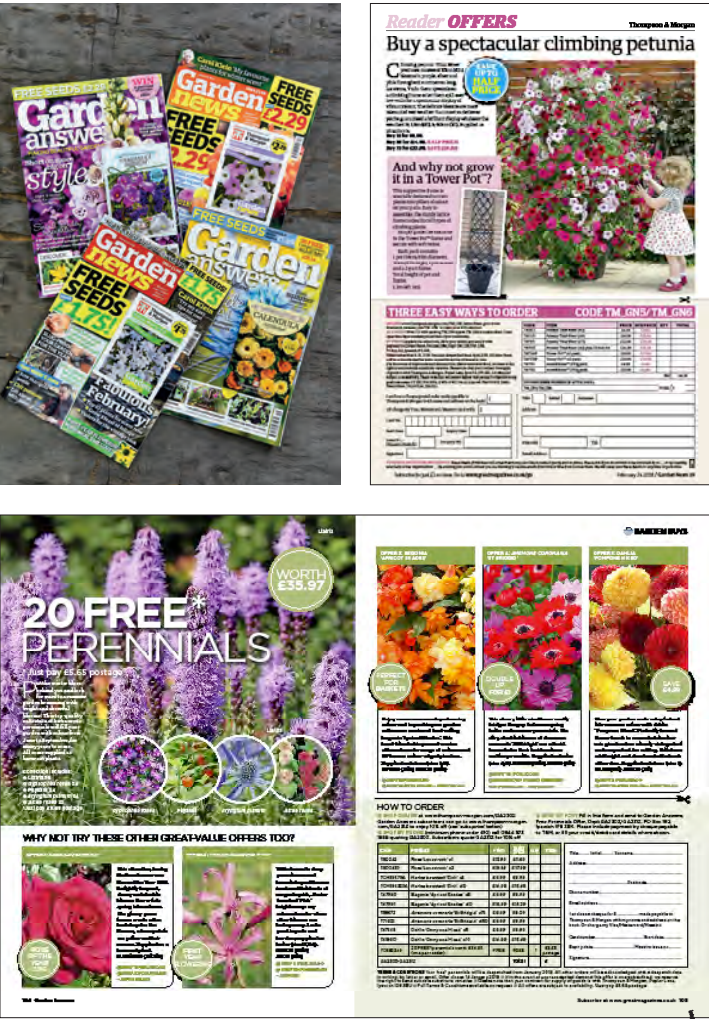

Thompson & Morgan provides the seed packets that are cover mounted onto Garden News (the UK's No. 1 weekly gardening magazine) and Garden Answers, its monthly sister magazine. The varieties are carefully selected to ensure readers receive a wide range of seeds to try in their gardens and also are able to sow them as soon as they receive them. The retail value of the seeds often exceeds the purchase price of the magazines, making these titles extremely attractive to customers – not only do they get a superb magazine but also free seeds that allow them to give gardening a go for themselves, whether they are beginners or have been gardening for years.

Adding a promotional seed packet to your publication, whether it is a magazine, brochure, catalogue or programme, will instantly add value and attract attention. Personalising the seed packet with your own bespoke branding ensures that customers retain information about your brand long after the catalogue or magazine has been passed on or recycled.

Check out these quick facts:

- On average, Thompson & Morgan produce over 100,000 packets for each magazine issue.
- We supply over 160 different seed varieties for cover mounting on Garden News and Garden Answers every year.
- As well as promotional seed packets, Thompson and Morgan also work with Garden News and Garden Answers in other ways. There are reader offers in each edition that allow readers access to exclusive products and discounts. Check out an example of one of our offers on the right!

Thanks to our close relationship with the people behind Garden News and Garden Answers, we are able to offer you exclusive access to their magazine subscriptions – adding a subscription offer to your promotional seed packet is an excellent way to add even more value. Check out what they have to say below!

Magazine Subscriptions

Psst.... Did you know? That using a magazine subscription as an incentive in your next marketing campaign is a perfect way to enhance your brand and reward your customers? Our specialist Partnerships Team has a wealth of experience from set up to delivery and can offer you a solution to meet your particular budget and audience demographic.

With over 70 exciting titles to choose from, we have the ability to offer both targeted and broad solutions

- help you retain your customers
- help incentivise product sales
- help generate new prospects
- add excitement to your campaigns
- generate an additional revenue stream for your business

It's easy:

Our expert team do all the legwork to set up these promotions so you don't have to:

Contact: Gillian McDonald, Partnerships Marketing Manager,  
Tel no: 01733 468804

We will talk you through the options available to help find a successful solution for your campaign.

Our technical growing staff have carried out extensive cultural tests for all varieties to add additional value and help you sell more seed and plants.

Take advantage of our extensive knowledge and push sales themes like 'First year flowering perennials' that we have marked with this symbol on each applicable variety.

Each variety has a group as indicated by the letter symbol at the end of each description. The grouping is based on northern European climate conditions.

Cultural Groups

- A** First year flowering perennials and Half-hardy perennials (HHP)
- B** Hardy perennials (HP) and biennials (HB)
- C** Hardy annuals (HA)
- D** Half-hardy annuals (HHA) and vegetables
- E** Violas and Pansies

**A** FIRST YEAR FLOWERING PERENNIALS & HALF-HARDY PERENNIALS

Sowing time: January-March

Germination temperature: 18-20°C (65-68°F)

Days to germinate: 10-14

**SOWING** Sow onto a moist seed-sowing compost in a 576 to 150 cell plug tray or larger cell if preferred. Cover lightly with vermiculite to the depth of the seed and propagate at 18-20°C (65-68°F). Germination should take place after approximately 10-14 days depending on the variety.

**GROWING ON** Grow on at 15°C (60°F) reducing to 10°C (50°F) as the seedlings develop and fill the tray. When the plug plants are established - generally 6-8 weeks from sowing - pot on into 1 litre pots for sales in April-early May or pot 3 plugs into a 2 or 3 litre pot for later sales in flower in late June.

Note: All first-year-flowering perennials can also be treated as hardy perennials - see below.

**B** HARDY PERENNIALS AND BIENNIALS

Sowing time: May-July

Germination temperature: 18-20°C (65-68°F)

Days to germinate: 10-14

**SOWING** Sow onto a moist seed-sowing compost in a 576 to 150 cell plug tray or similar size unit. Cover seed with vermiculite to its own depth until no longer visible and propagate at 18-20°C (65-68°F). Germination should take place after 10-14 days. After germination maintain a temperature of 15°C (60°F) or as cool as possible depending on the weather conditions. Shade the seedlings from strong, direct sunlight.

**GROWING ON** Grow on the seedlings in a lightly shaded area until they are established and fill the tray. Pot on in late August-September into 1 litre pots, or put 3 plugs into 2 or 3 litre pots. Over-winter in a well-ventilated, unheated glasshouse or tunnel for sales the following March-April or for flowering plants ready to sell from early May-June.

SOWING & GROWING

C HARDY ANNUALS

**Sowing time:** September and January-March  
**Germination temperature:** 15-20°C (60-68°F)  
**Days to germinate:** 7-10

**SOWING** For best results multi sow 3 to 4 seeds per cell in a 150 cell plug tray or slightly larger unit. Sow on to the surface of a free-draining, moist seed-sowing compost and cover with 3-5mm (¼in) of vermiculite. Propagate at 15-20°C (60-68°F). Germination should take place in approximately 7-10 days. Maintain a temperature of 15°C (60°F) after germination until the seedlings are established. Alternatively sow direct into 12 packs, 9cm pots or preferred final unit of sale.

**GROWING ON** When the seedlings are established transfer the plugs into a 9cm pot or 6 pack. This should result in quality plants with a good display of flowers for sale from May onwards.

**DIRECT SOW** Sow direct into open ground in September or from March-June. The speed of germination will depend on the soil temperature and weather conditions and could be from 7 to 21 days. Sow the seed 2-3cm (¾-1¼in) deep in rows 60-90 cm (25-35in) apart depending on variety with a distance of 10-30 cm (4-12in) between the plants. Ensure all ground is weed free and well prepared before sowing.

D HALF HARDY ANNUALS & VEGETABLES

**Sowing time:** February-April  
**Germination temperature:** 20°C (68°F)  
**Days to germinate:** 7-10

**SOWING** Sow onto the surface of a moist seed-sowing compost in a 576 to 150 cell plug tray depending on the variety or slightly larger unit if preferred. Cover with vermiculite to the depth of the seed until the seed is not visible and propagate at 20°C (68°F). Germination should take place after 7-10 days. Maintain a temperature of 15°C (60°F) for the seedlings after germination.

**GROWING ON** Continue to grow the seedlings on at 15°C (60°F) until they are established and fill the tray. Transfer to a 12 pack, 6 pack or 9-cm pot and continue to grow on at 10-15°C (50-60°F). Early February sowings will result in flowering plants for sale in late April-May. Later sowings made in April can be potted on into 1 litre pots for sales of more established flowering plants in late June. Use of the growth regulator B Nine will help to keep the plants compact.

E VIOLAS & PANSIES

**Sowing time:** January, June and September  
**Germination temperature:** 15-18°C (60-65°F)  
**Days to germinate:** 7-10

**SOWING** Sow onto a moist seed-sowing compost in a 576 plug tray or similar size unit, cover lightly with vermiculite and propagate at 15-18°C (60-65°F). Germination should take place after 7-10 days. Sow in January for sales in April; in June for sales in September; and in September for over-wintering for sale in flower in early spring. Care should be taken with summer sowings to ensure that germination temperatures do not exceed 20°C (68°F) as this will reduce the rate of germination considerably.

**GROWING ON** Grow on the seedlings from the January sowings at 15°C (60°F) until they are established and cover the surface of the plug tray. Take care to grow quite cool to help avoid any stretching of the plants. Approximately 6 weeks from sowing transfer to a 12 pack, 6 pack or 9cm pot. January sowings should be ready for sale in early to mid April. If additional growth control is required then Cycocel can be applied, which will help to improve the quality and habit of the plants.

June sowings should be grown on as cool as possible, shaded from direct sunlight, and potted on as above. This will give plants for sale in flower from September onwards.

September sowings should be ready to be transferred to packs and pots in late October and held over winter in a well-ventilated, unheated glasshouse or tunnel for sale in flower in late February-early March.

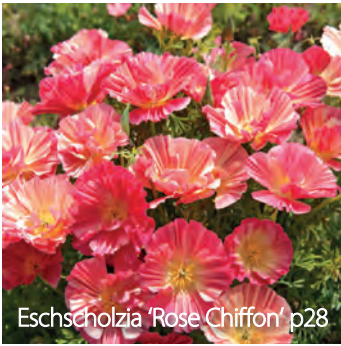

Pansy and Viola can be susceptible to both powdery and downy mildew so always be vigilant for these diseases and treat promptly with the appropriate chemical.

Wholesale Terms of Business

Expressions “the company”, “we”, “us”, “seller”, “T&M” refer to Thompson & Morgan, a trading division of Branded Garden Products Limited. The expressions “purchaser(s)”, “customer(s)” refer to persons, firms or companies contracting with the company for the purchase of its products.

Prices are in either Pounds sterling, Euro or US dollars and are based upon prevailing costs. We reserve the right to change prices without notice. Prices are for the quantity or unit as specified in the relevant price list or catalogue unless otherwise stated. VAT and sales tax will be applied at the prevailing rate where appropriate.

Shipping and Handling charges will be applied. These may vary according to size of order and the location of the customer. Individual charges will be applied to wholesale orders.

Limitation of Liability

a) The company believes that the description and characteristics of the products appearing in its catalogue are materially correct. However, all information whether contained in our catalogue or website or given by our staff relating to characteristics, periods of maturity or fitness for any particular purpose or otherwise relating to the performance of the product is given for general guidance only. Purchasers are advised that any such information given to them does not constitute a representation by the company as to these matters and should not be relied upon by the purchaser. Purchasers should satisfy themselves that any products which they order are of a type and performance satisfactory for their requirements and order such products at their own risk.

b) Seed and plant quality: in the event that any seeds or plants supplied do not comply with the terms of contract of sale or prove defective, whether as regards purity or germination or otherwise, the company will, [subject to the purchaser providing at his own expense proof that the seeds or plants alleged not to have performed satisfactorily were in fact supplied by us and that they were sown and/or cultivated under suitable conditions, treated carefully and correctly throughout and subject only to conditions as were likely to produce a favourable crop], at its option replace the seeds or plants free of charge to the purchaser or will refund all payments made to us by the purchaser in respect of the defective seeds or plants and this will be the limit and complete extent of the company's obligation. No claims regarding germination can be accepted if made later than 7 days after delivery. Seller accepts no liability whatsoever for any seed which has been repacked by the buyer.

c) Seeds or plants which we provide are intended only for use in or export to countries where their cultivation is permitted. It is the sole responsibility of the purchaser to ascertain and obey all laws, which apply to the possession and cultivation of any items listed in our catalogues or website, this includes plant irritation and toxicity. Please consult local, provisional and federal laws (including pertinent laws applied to your country) before placing an order. T&M does not assume any responsibility if customs or similar agencies confiscate seeds or plants. The risk of shipping falls on the customer.

d) For the avoidance of doubt, all liability whatsoever is excluded for any loss, expense or damage whether direct or consequential arising in any way whatsoever in connection with any products supplied by the company whether due to any failure in the performance of or any defect in any such products or otherwise save for the liability to replace or refund in b above. The price of all goods sold by us is based upon the foregoing limitations on our liability and would be much greater if a more extensive liability were required to be undertaken by us.

Minimum Order. The minimum order value will apply; please see the relevant price list. Each delivery or consignment shall stand as a separate contract.

Damage, Delay or Loss in Transit. It is the purchaser's responsibility to inspect goods carefully on arrival. If there is any sign of damage the purchaser should notify us immediately by email, phone or fax enabling us to pursue a claim with the carrier. In the event of non-arrival of goods within 14 days of order, please advise us enabling us time to follow up the matter within the carriers' normal terms of 28 days. Customers should not return products to us without first obtaining authorisation and shipping instructions.

Title and Risk. Until paid for in full, all goods supplied by us shall remain our property. Risk passes to the buyer on shipment of the goods. Any dispute which may arise to be settled by arbitration in accordance with the rules of the United Kingdom Agricultural Supply Trade Association Limited (UKASTA).

Crop Shortage. In the event of a product shortage we reserve the right to fulfil or pro-rate orders on a first come, first served basis or cancel the contract without liability to either party. In the event of cancellation, we will credit any payment already made by the customer.

Payment. Sterling, Euro and US Dollar online and faxed orders will require payment by credit or debit card which shall be debited on receipt of order to reserve the products. Orders by post may be accompanied by credit or debit card details or a cheque made payable to Thompson & Morgan. We will accept cheques drawn in the following currencies: Sterling, Euro and US Dollars. [US and Canadian customers will be required to pay in US Dollars].

Credit Accounts. We will agree to consider credit facilities for larger customers. Credit accounts are due within 30 days of invoice and we reserve the right to charge interest on overdue accounts at 3% above the Bank of England base rate. We may refuse to execute new orders if overdue accounts remain outstanding. In the event that a customer (a) has a liquidator or receiver appointed in respect to any property or business undertaking, (b) announces that it has ceased or will be ceasing to trade, (c) notifies any creditor that it is unable to pay debts as they fall due, (d) calls or hold a meeting of creditors, (e) commits an act of bankruptcy or is adjudicated bankrupt or has an administration order made, (f) enters into any arrangements with its creditors or (g) suffers distress or execution to be levied on the buyer's property, then not withstanding any previous arrangements for deferred settlement, all sums payable to us by the buyer shall become immediately due and we have the right (without prejudice to any right or remedy available to us) to cancel or suspend future deliveries.

Protection of Seller's Rights. The customer agrees that seed or plants are sold for the express purpose of onward sale as seed or plants and NOT for seed crop multiplication. The buyer agrees to comply at all times with the requirements of the Plant Varieties and Seeds Act 1964 (as amended) in so far as they relate to the protection of the seller's Plant Breeder Rights in seeds and plants. The customer agrees that the products shall be supplied for its sole use. The customer agrees not to export the seed or plants from the territory in which the customer is resident. The customer agrees to indemnify the seller against any loss, damages and costs or expenses incurred by the seller arising from any non-compliance with these requirements. The customer agrees that they will ensure that their terms of sale protect the seller's rights as detailed here, throughout the supply chain.

Acceptance of Terms. The giving or a sending of an order to us constitutes an acceptance of these terms by the purchaser. If the purchaser does not accept these terms, the goods must be returned forthwith.

These Terms and Conditions are governed by the laws of England and Wales. Copyright © Thompson & Morgan (Group) Ltd ALL RIGHTS RESERVED February 2020
